

# SPANISH FLU IS EPIDEMIC

## Three Deaths in Kansas Towns From Disease.

### 200 CASES IN ELLIS COUNTY

#### Increasing at Camp Funston At Rate of 300 a Day—45 Deaths in New York in 24 Hours.

Topeka, Oct. 1.—Two hundred cases of Spanish influenza at Hays, Ellis county, Kas., were reported to the state board of health today. Dr. J. J. Sippy, of the department, was at once sent to Hays to assist in putting down the epidemic. Two more deaths have occurred at Hays, making a total of three. The state normal school there is open, but the Hays city schools have been closed. The health department today received official notice from Camp Funston that a strict quarantine has been established there. No visitors are admitted and no furloughs granted. It is reported that the epidemic there is increasing at the rate of about 300 a day.

#### EPIDEMIC IN NEW YORK.

Forty-five Deaths There in Last 24 Hours.

New York, Oct. 1.—With 326 new cases of Spanish influenza reported for the 24 hours ending at 10 a. m. and 45 deaths, Health Commissioner of Copeland admitted today that the disease had reached the proportions of an epidemic in this city.

#### 800 New Cases Camp Custer.

Battle Creek, Mich., Oct. 1.—More than 800 additional cases of Spanish influenza were reported at Camp Custer this forenoon.

#### Three Deaths Camp Taylor.

Louisville, Ky., Oct. 1.—Patients suffering with Spanish influenza increased from 3,000 to approximately 4,000 during the night at Camp Zachariah Taylor. Three deaths from pneumonia were reported.

#### A Cold Bar, You.

Chicago, Oct. 1.—Motion picture theatres posted notices today asking any member of the audience with a cold to leave at once. Public school teachers were instructed to send home any pupils showing even signs of a cold to combat the spread of Spanish influenza.

#### Public School Closed.

Springfield, Mo., Oct. 1.—The public schools here were ordered closed today as a result of numerous cases of influenza among students and teachers. A meeting of the board of health has been called to be held tomorrow to consider the closing of all public meeting places until the danger of a more serious epidemic is abated. Only one death has been reported from this cause.

# FLU SPREADS IN KANSAS

## In 48 Hours 1176 New Cases Reported.

### STATE UNIVERSITY CLOSED

#### But Students Ordered to Remain in Lawrence—Hutchinson and Lawrence Closed Schools and Theatres.

Topeka, Oct. 8.—The Spanish influenza is spreading in Kansas at a rate that is giving the state health department grave concern, officials asserted today. In 48 hours 1,176 new cases were reported, as against a total of 1,339 for the preceding week. Jewell county alone has reported more than 500 cases. Jewell county has reported 148 cases.

There are only thirty cases in Topeka, the city health department announced today. Six cases have developed in the city jail, and it has been placed under quarantine. All state institutions were quarantined against visitors today.

Herington has 65 cases and the schools there were closed today.

#### State University Closed.

Lawrence, Kas., Oct. 8.—Under orders from the local health authorities, the University of Kansas, the public schools and motion picture theatres are closed today to prevent possible spreading of the influenza epidemic. University students were ordered to remain in the city.

#### Hutchinson Health Board Acts.

Hutchinson, Kas., Oct. 8.—By an order of the city board of health the Hutchinson schools, churches, theatres, etc., will be closed and all public gatherings prohibited until further orders. The general prevalence of influenza and what are suspected to be a few local cases, is given as the cause.

#### Nine Deaths.

Kansas City, Mo., Oct. 8.—Nine additional deaths due to Spanish influenza, and 76 new cases of the disease were reported to the health authorities during the twenty-four hours ending at noon today.

Drastic steps were being taken by the city health department today to prevent the spread of the disease. The street car company has been requested to limit the number of passengers that may stand in one car to twenty.

#### St. Louis Closed Too.

St. Louis, Oct. 8.—The closing order of the St. Louis health commissioner which prevents all meetings indoors and outdoors, closes St. Louis University, and causes the abandonment of the foot ball schedule until the order is rescinded. While Washington University is outside the city limits and not affected, the military unit at Washington University is under quarantine, and the foot ball game for next Saturday is cancelled.

# TO ISOLATE FLU PATIENTS

## Charles A. Brown Donates Building for Use.

### MANY NURSES VOLUNTEER

#### Forty-Two Placed Themselves at Disposal of Miss Grace Crosby Power.

Persons suffering with Spanish influenza will be isolated on the second floor of the old Allaman hospital at Third and Commercial streets, where cases cannot be properly isolated or cared for at home, according to arrangements perfected today by Dr. Charles W. Robinson, county health officer, and the Atchison county Red Cross chapter.

Forty-two nurses and women who have been taking work in first aid classes under Miss Grace Crosby Power, superintendent of the Atchison hospital, today placed themselves at the disposal of Miss Power, for service at the temporary isolation hospital or in private homes.

Forty-five new cases of the flu were reported to Dr. Robinson today from the city and county, bringing the total since the epidemic began Monday to 121. Every effort is being made to get the epidemic stamped out as soon as possible, and every one is conforming with the health regulations as strictly as possible. Today Dr. Robinson, after a telephone conversation with Dr. S. J. Crumline, secretary of the State Board of Health, ordered all billiard halls closed, with the exception of the tobacco departments. Every billiard table in Atchison is covered up today.

The building in which the isolation hospital is being installed this afternoon was donated to the local Red Cross chapter for the purpose today by Charles A. Brown, who is active in Red Cross work. Several other locations were considered, but this was found to be the best, being away from the business center. The building will be patrolled by members of the Atchison National Guard company, to be detailed by Captain Harry S. Tooley.

Since the National Guard was placed on the federal pay roll, men assigned to guard duty will be paid for their time. Forty cots have been secured by the local Red Cross chapter, and are being placed in the building today. Stoves are being put up, and by tonight at least three patients will be receiving treatment there.

Another Red Cross first aid class which has been studying under Miss Powers is yet to be heard from this afternoon, and it is expected many members of this class will volunteer. Those who don't offer their services may be drafted, should the situation become grave.

Two more cases were reported at Cummings today, and Dr. Robinson ordered the Cummings school and revival meetings in progress there closed at once. Next week there will be no school whatever in Atchison county, in compliance with last night's proclamation by Arthur Capper, governor of Kansas, ordering all schools to close and placing a ban on public gatherings of all kinds from Saturday, October 12 for a week and including Saturday, October 19.

# NO SATURDAY NIGHT CROWDS

**Stores To Close At 7 P. M  
By Order of Mayor.**

**ON ACCOUNT OF INFLUENZA**

**Orders Were Issued to All Atch-  
son Merchants This Morning  
Through the Police De-  
partment.**

Taking extra precaution against the spread of Spanish influenza in Atchison, Mayor Weinman this morning issued an order that all stores close at 7 p. m., Saturday evening until further orders.

Atchison is what is known as a "Saturday night town." Everybody who can comes down after supper and the sidewalks are a perfect jam on Commercial street.

Influenza is essentially a crowd disease; it is spread by intimate contact, and fought by isolation. For that reason it has been deemed advisable to dispense with all public gatherings likely to be attended by more than twenty persons. Schools and theatres have been closed, but this would have been useless if the Saturday night crowds were permitted in the opinion of the mayor and his advisors.

Merchants are not kicking. They are complying freely only too glad to do what they can to prevent a real epidemic here.

PLACE BRIDGE IN QUARRANTINE

(Continued from Page 1.)

1 miles south of Effingham, who is  
1 suffering pneumonia complicated  
8 with influenza, is unchanged today.  
8 Only one serious case, caused by the  
5 pneumonia complication, has been  
5 reported today. That is the case of  
0 A. Ecelebene, of Emporia, a student  
0 at Midland college and a member of  
5 the Students' Army Training Corps.  
5 His case has been isolated, and Mrs.  
c Virginia Kimble, visiting nurse, is at-  
10 tending him, going there last night  
5 after efforts to get nurses from St.  
5 Joe and Kansas City had failed. Both  
0 cities are short of nurses on account  
0 of epidemics there.

0 "There is not the slightest doubt  
0 about the necessity of drafting mem-  
0 bers of Atchison first aid classes,"  
0 said Dr. Robinson today, "as the  
0 nurse shortage is extremely serious."

0 David Hayes, his wife and five  
0 children all are severely ill with in-  
0 fluenza at their home, 714 Spring  
0 street, and three of the children were  
0 in one bed until this afternoon, when  
0 cots were provided by the Atchison  
0 county Red Cross chapter. A nurse  
0 has been placed in charge of the  
0 house.

0 Dr. J. E. Thompson, of Huron, tele-  
0 phoned to Dr. Robinson today for  
0 four nurses at once, and Dr. G. E.  
0 White, of Effingham, telephoned for  
0 one. Neither appeal could be re-  
0 sponded to on account of the short-  
0 age of nurses.

**WILL MOBILIZE  
KANSAS DOCTORS**

---

**Also Nurses as Influenza Epidemic Is  
Very Dangerous.**

Topeka, Kas., Oct. 12—Dr. J. S. Crumbine, head of the state Health department, today received a telegram from Surgeon General Blue at Washington requesting that immediate preparation be made to mobilize all doctors and nurses in the state for volunteer services wherever sent. Dr. Crumbine believes the plan includes sending doctors and nurses from one state to another to help put down the influenza epidemic. There already is scarcity of both doctors and nurses in this state, Dr. Crumbine asserts. An appeal was received today by the board from Natham, Butler county for a doctor.

**211,000 "FLU" CASES**

---

**In Army Camps There Is Gain—  
With 7,432 Fatalities Reported.**

Washington, Oct. 11—Two hundred  
and eleven thousand cases of in-  
fluenza have been reported in army  
camps to date, with 7,432 fatalities.

One week ago only 17 of the 42  
larger camps were infected. There  
are now 33 camps reporting more  
than 500 cases each for the week. The  
number of new cases and deaths, as  
reported to the war department, con-  
tinued to show an increase.

IN COUNTRY**

**Death From Pneumonia,  
Following Influenza.**

**ALBERT ROLL, PRAIRIE VIEW**

**Was Born and Reared on Farm  
Where He Died, and Leaves a  
Widow and Five Children.**

Albert Roll, a prominent farmer of the Prairie View neighborhood, six miles south of Effingham, died at 5 p. m., yesterday from pneumonia, following influenza. He had been sick ten days. Two children in the family now have influenza.

Forty years old last Sunday, Mr. Roll had all his life been a resident of Prairie View. He was born and reared on the farm where he died, and was one of the finest and most highly esteemed men in the community. He was married in 1907 to Miss Addie Longest, who with five children, survive. The eldest is ten years old; the youngest are twins three years old.

It will be remembered that one of the children, Earl, was badly burned three months ago through drinking concentrated lye. No expense or trouble was spared by the devoted parents to relieve his suffering and restore him to health, and he is now in Kirksville, Mo., under treatment. His mother was there with him until a few days ago.

Besides his immediate family Mr. Roll is survived by a brother, Fred Roll, of Birney, Mont., and a sister, Mrs. Ida Hammond.

The funeral will be at 2:30 p. m., Sunday, and will be private. The burial will be in the Effingham cemetery.

## BRIDGE BAN ON AT NOON

---

To prevent the assembling of the usual afternoon crowds in East Atchison today, Mayor Louis Weinman this morning ordered the ban on bridge traffic to become effective at noon today instead of at 6 o'clock this evening. This is effective only today and next Saturday. Other days the bridge goes into quarantine at 6 o'clock in the evening and remains in that state until 12 o'clock at night.

## SPANISH INFLUENZA--WHAT IT IS AND HOW IT SHOULD BE TREATED

**Nothing New—Simply The Old Grip, or la Grippe That Was  
Epidemic in 1889-90, Only Then It Came From Russia by  
Way of France and This Time by Way of Spain.**

**Go to Bed and Stay Quiet—Take  
A Laxative—Eat Plenty of  
Nourishing Food—Keep up  
Your Strength—Nature Is  
The Only "Cure."**

**ALWAYS CALL A DOCTOR**

**NO OCCASION FOR PANIC.**

Spanish influenza, which appeared in Spain in May, has all the appearance of grip or la grippe, which has swept over the world in numerous epidemics as far back as history runs. Hippocrates refers to an epidemic in 412 B. C. which is regarded by many to have been influenza. Every century has had its attacks. Beginning with 1831, this country has had five epidemics, the last in 1885-90.

There is no occasion for panic—Influenza itself has a very low percentage of fatalities—not over one death out of every four hundred cases, according to the N. C. Board of Health. The chief danger lies in complications arising, attacking principally patients in a run down condition—those who don't go to bed soon enough, or those who get up too early.

**THE SYMPTOMS.**

Grippe, or influenza as it is now called, usually begins with a chill followed by aching, feverishness and sometimes nausea and dizziness, and a general feeling of weakness and depression. The temperature is from 100 to 104, and the fever usually lasts from three to five days. The germs attack the mucous membrane, of lining of the air passages—nose, throat and bronchial tubes—there is usually a hard cough, especially bad at night, often times a sore throat or tonsillitis, and frequently all the appearances of a severe head cold.

**THE TREATMENT.**

Go to bed at the first symptoms, not only for your own sake but to avoid spreading the disease to others—take a purgative, eat plenty of nourishing food, remain perfectly quiet and don't worry. Quinine, aspirin or Dover's Powder, etc., may be administered by the physician's directions to relieve the aching. But there is no cure or specific for influenza—the disease must run its course. Nature herself will throw off the attack if only you keep up your strength. The chief danger lies in the complications which may arise. Influenza so weakens the bodily resistance that there is danger of pneumonia or bronchitis developing, and sometimes inflammation of the middle ear, or heart affections. For these reasons, it is very important that the patient remain in bed until his strength returns—stay in bed at least two days or more after the fever has left you, or if you are over

50 or not strong, stay in bed four days or more, according to the severity of the attack.

**EXTERNAL APPLICATIONS.**

In order to stimulate the lining of the air passages to throw off the grippe germs, to aid in loosening the phlegm and keeping the air passages open, thus making the breathing easier, Vick's VapoRub will be found effective. Wet towels should be applied over the throat, chest and back between the shoulder blades to open the pores. Then VapoRub should be rubbed in over the parts until the skin is red, spread on thickly and covered with two thicknesses of hot flannel cloths. Leave the clothing loose around the neck as the heat of the body liberates the ingredients in the form of vapors. These vapors, inhaled with every breath, carry the medication directly to the parts affected. At the same time, VapoRub is absorbed through and stimulates the skin, attracting the blood to the surface, and thus aids in relieving the congestion within.

**HOW TO AVOID THE DISEASE.**

Evidence seems to prove that this is a germ disease, spread principally by human contact, chiefly through coughing, sneezing or spitting. So avoid persons having colds—which means avoiding crowds—common drinking cups, roller towels, etc. Keep up your bodily strength by plenty of exercise in the open air, and good food. Above all, keep free from colds, as colds irritate the lining of the air passages and render them much better breeding places for the germs.

Use Vick's VapoRub at the very first sign of a cold. For a head cold, melt a little VapoRub in a spoon and inhale the vapors, or better still, use VapoRub in a benzoin steam kettle. If this is not available, use an ordinary tea-kettle. Fill half full of boiling water, put in half a teaspoon of VapoRub from time to time—keep the kettle just slowly boiling and inhale the steam arising.

**NOTE.** Vick's VapoRub is the discovery of a North Carolina druggist, who found how to combine, in salve form, Menthol and Campher with such volatile oils as Eucalyptus, Thyme, Cubeb, etc., so that when the salve is applied to the body heat, these ingredients are liberated in the form of vapors.

VapoRub is comparatively new in New York State and New England and a few Western states where it is just now being introduced, but in other sections of the country it is the standard home remedy in more than a million homes for all forms of cold troubles. Over six million jars were sold last year. It is particularly recommended for children's croup or colds, since it is externally applied and therefore can be used as freely as desired without the slightest harmful effects. VapoRub can be had in three sizes at all druggists.

ATCHISON DAILY GLOBE, MONDAY, OCT 14, 1918

### ONLY 17 NEW FLU CASES

Only 17 new cases of influenza were reported today in Atchison and the county, and 12 of these were in the vicinity of Effingham. Dr. Charles W. Robinson, county health officer, is sick in bed, but not with the flu. He is suffering from the strain he has been under since the epidemic started and the loss of sleep. Several nights he has not been able to sleep at all, on account of the many calls made upon him as city and county physician for assistance. The emergency hospital at Third and Commercial streets, in charge of Mrs. Virginia Kimble, visiting nurse, has six patients, all of them men. Four new cases were reported from Midland college today, and only one from Atchison proper. One more death from pneumonia following influenza occurred Saturday night, that of the late Harry Park. The 17 reported today include new cases for both Sunday and this morning. Saturday 10 new cases were reported against 46 Friday.

### FLU GAINING IN KANSAS

More Than 3,000 New Cases Reported in Kansas.

Topeka, Kas., Oct. 14—More than three thousand new cases of Spanish influenza throughout the state were reported today to the state board of health. These reports cover Sunday and part of today and indicate that the epidemic is gaining. Board of health officials state however that with the state closing order now in effect, a marked decrease in the number of cases is expected to set in within forty-eight hours. They say the worst outbreak of the disease in the state is in Crawford county where there are many mining camps and towns.

Topeka today has four hundred and four cases and the 72-room hotel recently rented as an isolation hospital already is almost filled with patients. Four more deaths occurred in Topeka yesterday and today.

# SPANISH INFLUENZA--WHAT IT IS AND HOW IT SHOULD BE TREATED

Nothing New—Simply The Old Grip, or la Grippe That Was Epidemic in 1889-90, Only Then It Came From Russia by Way of France and This Time by Way of Spain.

**Go to Bed and Stay Quiet—Take A Laxative—Eat Plenty of Nourishing Food—Keep up Your Strength—Nature Is The Only "Cure."**

**ALWAYS CALL A DOCTOR.**

### NO OCCASION FOR PANIC.

Spanish influenza, which appeared in Spain in May, has all the appearance of grip or la grippe, which has swept over the world in numerous epidemics as far back as history runs. Hippocrates refers to an epidemic in 412 B. C. which is regarded by many to have been influenza. Every century has had its attacks. Beginning with 1821, this country has had five epidemics, the last in 1889-90.

There is no occasion for panic—Influenza itself has a very low percentage of fatalities—not over one death out of every four hundred cases, according to the N. C. Board of Health. The chief danger lies in complications arising, attacking principally patients in a run down condition—those who don't go to bed soon enough, or those who get up too early.

### THE SYMPTOMS.

Grippe, or influenza as it is now called, usually begins with a chill followed by aching, feverishness and sometimes nausea and dizziness, and a general feeling of weakness and depression. The temperature is from 100 to 104, and the fever usually lasts from three to five days. The germs attack the mucous membrane, or lining of the air passages—nose, throat and bronchial tubes—there is usually a hard cough, especially bad at night, often times a sore throat or tonsillitis, and frequently all the appearances of a severe head cold.

### THE TREATMENT.

Go to bed at the first symptoms, not only for your own sake but to avoid spreading the disease to others—take a purgative, eat plenty of nourishing food, remain perfectly quiet and don't worry. Quinine, aspirin or Dover's Powder, etc., may be administered by the physician's directions to relieve the aching. But there is no cure or specific for influenza—the disease must run its course, Nature herself will throw off the attack if only you keep up your strength. The chief danger lies in the complications which may arise. Influenza so weakens the bodily resistance that there is danger of pneumonia or bronchitis developing, and sometimes inflammation of the middle ear, or heart affections. For these reasons, it is very important that the patient remain in bed until his strength returns—stay in bed at least two days or more after the fever has left you, or if you are over

50 or not strong, stay in bed four days or more, according to the severity of the attack.

### EXTERNAL APPLICATIONS.

In order to stimulate the lining of the air passages to throw off the grippe germs, to aid in loosening the phlegm and keeping the air passages open, thus making the breathing easier, Vick's VapoRub will be found effective. Hot, wet towels should be applied over the throat, chest and back between the shoulder blades to open the pores. Then VapoRub should be rubbed in over the parts until the skin is red, spread on thickly and covered with two thicknesses of hot flannel cloths. Leave the clothing loose around the neck as the heat of the body liberates the ingredients in the form of vapors. These vapors, inhaled with each breath, carry the medication directly to the parts affected. At the same time, VapoRub is absorbed through and stimulates the skin, attracting the blood to the surface, and thus aids in relieving the congestion within.

### HOW TO AVOID THE DISEASE.

Evidence seems to prove that this is a germ disease, spread principally by human contact, chiefly through coughing, sneezing or spitting. So avoid persons having colds—which means avoiding crowds—common drinking cups, roller towels, etc. Keep up your bodily strength by plenty of exercise in the open air, and good food. Above all, keep free from colds, as colds irritate the lining of the air passages and render them much better breeding places for the germs.

Use Vick's VapoRub at the very first sign of a cold. For a head cold, melt a little VapoRub in a spoon and inhale the vapors, or better still, use VapoRub in a benzoin steam kettle. If this is not available, use an ordinary tea-kettle. Fill half full of boiling water, put in half a teaspoon of VapoRub from time to time—keep the kettle just slowly boiling and inhale the steam arising.

**NOTE.** Vick's VapoRub is the discovery of a North Carolina druggist, who found how to combine, in salve form, Menthol and Camphor with such volatile oils as Eucalyptus, Thyme, Cubeb, etc., so that when the salve is applied to the body heat, these ingredients are liberated in the form of vapors.

VapoRub is comparatively new in New York State and New England and a few Western states where it is just now being introduced, but in other sections of the country it is the standard home remedy in more than a million homes for all forms of cold troubles. Over six million jars were sold last year. It is particularly recommended for children's croup or colds, since it is externally applied and therefore can be used as freely as desired without the slightest harmful effects. ## FLU IS ON DECREASE NOW

Trenton, N. J., Oct. 15—The state department of health announced today that reports received from various parts of the state today indicated a decrease in the number of new cases of Spanish influenza. Perth Amboy, however, near the scene of the recent big explosion, reported that deaths were so numerous the bodies may have to be buried in trenches.

### Slowing Down at Springfield.

Springfield, Mo., Oct. 15—Reports to the health authorities today indicated that the epidemic of influenza will have run its course here in three weeks and that the ban against public assemblies may be removed next Monday morning. There were four deaths yesterday against seventeen Sunday. Five were reported today. Forty persons are being treated at the Red Cross emergency hospital. Three have died there since the hospital opened last Friday morning. There were 80 new cases reported today.

### At St. Louis 13 Deaths.

St. Louis, Mo., Oct. 15—Thirteen more deaths from Spanish influenza were reported and 430 new cases developed here during the last 24 hours. The board of aldermen yesterday passed an ordinance providing a fine of from \$5 to \$500 for failure of a physician to report cases. The quarantine at Washington university was lifted today as the epidemic there is said to be under control.

ATLANTIC GLOBE, WEDNESDAY

## INFLUENZA EPIDEMIC NOT UNDER CONTROL

That a few persons still are contracting Spanish influenza, probably exposed prior to or early in the quarantine, which was placed in effect last week, is shown by reports from Atchison and county physicians today by telephone to the office of Dr. Charles W. Robinson, county health officer. The epidemic is not yet under control, and Louis Weinman, mayor, said this morning the quarantine would not be lifted before Sunday, and perhaps not then. It would be a grave error, local physicians point out, to raise the quarantine too soon. Seventy new cases were reported to the health office today, covering Sunday, Monday and yesterday, an average of 23 a day. Up to noon today, only five new cases had been reported. The total number of cases to noon today was 271 since the epidemic started.

## HOW TO USE VICK'S VAPORUB IN TREATING SPANISH INFLUENZA

The Influenza Germs Attack the Lining of the Air Passages. When VapoRub is Applied Over Throat and Chest the Medicated Vapors Loosen the Phlegm, Open the Air Passages and Stimulate the Mucous Membrane to Throw off the Germs.

In Addition, VapoRub is Absorbed Through and Stimulates the Skin, Attracting the Blood to the Surface and Thus Aids in Reducing the Congestion Within.

CALL A PHYSICIAN—GO TO BED—STAY QUIET—DON'T WORRY.

There is no Occasion for Panic—Influenza Itself Has a Very Low Percentage of Fatalities, Not Over One Death Out of Every Four Hundred Cases, According to the N. C. Board of Health. The Chief Danger Lies in Complications Arising, Attacking Principally Patients in a Run Down Condition—Those Who Don't go to Bed soon Enough, or Those Who Get up too Early.

Spanish Influenza which appeared in Spain in May has all the appearance of grip or la grippe, which has swept over the world in numerous epidemics as far back as history runs. Hippocrates refers to an epidemic in 412 B. C. which is regarded by many to have been influenza. Every century has had its attacks. Beginning with 1831, this country has had five epidemics, the last in 1889-90.

### THE SYMPTOMS.

Grip, or influenza as it is now called, usually begins with a chill followed by aching, feverishness and sometimes nausea and dizziness, and general feeling of weakness and depression. The temperature is from 100 to 104, and the fever usually lasts from three to five days. The germs attack the mucous membranes, or lining of the air passages—nose, throat and bronchial tubes—there is usually a hard cough, especially bad at night, often times a sore throat or tonsillitis, and frequently all the appearances of severe cold.

### THE TREATMENT.

Go to bed at the first symptoms, not only for your own sake but to avoid spreading the disease to others—take a purgative, eat plenty of nourishing food, remain perfectly quiet and don't worry. Quinine, aspirin or Dover's Powder, etc., may be administered by the physician's directions to relieve the aching. But there is no cure or specific for influenza—the disease must run its course, but nature herself will throw off the attack if only you keep up your strength. The chief danger lies in the complications which may arise. Influenza so weakens the bodily resistance that there is danger of pneumonia, bronchitis developing and sometimes inflammation of the middle ear, or heart affections. For these reasons, it is very important that the patient remain in bed until his

strength returns—stay in bed at least two days or more after the fever has left you, or if you are over 50 or not strong, stay in bed four days or more, according to the severity of the attack.

### EXTERNAL APPLICATIONS.

In order to stimulate the lining of the air passages to throw off the grip germs, to aid in loosening the phlegm and keeping the air passages open, thus making the breathing easier, Vick's VapoRub will be found effective. Hot, wet towels should be applied over the throat, chest and back between the shoulder blades to open the pores. Then VapoRub should be rubbed in over the parts until the skin is red, spread on thickly and covered with two thicknesses of hot flannel cloths. Leave the clothing loose around the neck as the heat of the body liberates the ingredients in the form of vapors. These vapors, inhaled with each breath, carry the medication directly to the parts affected. At the same time, VapoRub is absorbed thru and stimulates the skin, attracting the blood to the surface and thus aids in relieving the congestion within.

### HOW TO AVOID THE DISEASE.

Evidence seems to prove that this is a germ disease, spread principally by human contact, chiefly thru coughing, sneezing or spitting. So avoid persons having colds—which means avoiding crowds—common drinking cups, roller towels, etc. Keep up your bodily strength by plenty of exercise in the open air, and good food. Above all, keep free from colds, as colds irritate the lining of the air passages and render them much better breeding places for the germs.

Use Vick's VapoRub at the very first sign of a cold. For a head cold, melt a little in a spoon and inhale the vapors, or better still, use VapoRub in a benzoin steam kettle. If this is not available, use an ordinary tea-kettle. Fill half full of boiling water, put in a teaspoon of VapoRub from time to time—keep the kettle just slowly boiling, and inhale the steam arising.

NOTE: Vick's VapoRub is the discovery of a North Carolina druggist, who found how to combine in salve form Menthol and Camphor with such essential oils as Eucalyptus, Thyme, Cubeb, etc., so that when the salve is applied to the body heat, these ingredients are liberated in the form of vapors.

VapoRub is comparatively new in New York, New England and a few western states, where it is just now being introduced. In other sections of the country, however, it is the standard home remedy in over a million homes for all forms of cold troubles—more than six million jars were sold last year.

It is particularly recommended for children's croup or colds, since it is externally applied and, therefore, can be used as freely as desired without the slightest harmful effects. VapoRub can be had in three sizes—\$9c, 50c, \$1.20—at all druggists.

# IN KANSAS 2,000 NEW CASES DAILY

**Average Maintained During  
the Week.**

**FIGHT IS A DRAW SO FAR**

**But Dr. S. J. Crumbine Believes  
Another Week of Closing Will  
Wipe Out Epidemic.**

Topeka, Kas., Oct. 19.—Reports to-  
day indicated that the number of  
new cases of Spanish influenza in  
the state would reach 2,000 today,  
this average having been maintained  
throughout the week. Up to noon to-  
day thirty-four counties had reported  
1,658 new cases.

Dr. S. J. Crumbine, head of the  
state department of health, says the  
fight against the epidemic is "a  
draw" but that with another week's  
closing order in effect he hopes that  
the epidemic will be noticeably sup-  
pressed within that period. Damp,  
rainy weather today, he said, tends  
to aggravate the situation. Tomor-  
row will be another churchless Sun-  
day for Kansas. The week's closing  
order also causes abandonment of  
extensive political campaign plans, al-  
ready announced by state committees  
of Republican and Democratic parties  
here.

Nine persons died here today from  
the epidemic. This is the largest's  
day's toll here yet.

Springfield, Mo., Oct. 19.—The in-  
fluenza epidemic here has not run its  
course. This was indicated today by  
reports to the health department  
which announced that unless the  
situation was much improved Monday  
more drastic regulations would be  
put into effect immediately. Eight  
deaths within 24 hours brought the  
total to 148 in three weeks. Only 35  
new cases were reported today. A  
general closing order which will af-  
fect stores and factories is being pre-  
pared to go into effect Monday. The  
ban against public meetings has not  
been lifted.

## RAIN INCREASES INFLUENZA

**Twenty-three Death Reported in Kan-  
sas City Today.**

Kansas City, Oct. 19.—Rainy  
weather has increased the number of  
new cases of Spanish influenza here  
and the number of deaths, according  
to city health officers, 23 death were  
reported today.

In Kansas City, Kas., eight deaths  
and 170 new cases were reported.  
The junior high school is being fitted  
as an emergency hospital.

## QUARANTINE CONTINUES UNTIL NEXT SATURDAY

Following orders issued by the State Board of Health and received by telephone this afternoon by Dr. Charles W. Robinson, county health officer, quarantine regulations to control the epidemic of influenza will continue until next Saturday night. By that time, the state board believes, the danger of a widespread epidemic will be over. In accordance with the order, Louis Weinman, mayor of Atchison, this afternoon extended the Atchison quarantine until that time. There is some doubt whether the order includes next Saturday, but this question will be cleared up later.

Apparently the epidemic is well under control in Atchison, as only six new cases were reported up to noon today, including all new cases since yesterday noon. In Atchison county, exclusive of Atchison, sixteen new cases were reported to the office of Dr. Robinson. This is a decrease over previous days. For the first time since the epidemic started, no new cases were reported from Midland college today.

## DEATHS FROM INFLUENZA

**Ruth Davis and Virginia Mize Succumb.**

**MISS DAVIS POPULAR SOCIALLY**

**Virginia Mize, 3½ Years Old, Was Daughter of Mr. and Mrs. Heber Mize.**

A death which has cast a gloom over Atchison is that of Miss Ruth Davis, oldest of Mr. and Mrs. A. L. Davis' daughters, who died this morning shortly after 5 o'clock of pneumonia. She was stricken a week ago Sunday with influenza. Pneumonia followed, and as Miss Ruth had a very weak heart her life could not be saved. From the first she had the best medical attention, and a nurse assisted her parents and sisters in taking care of her. She was much beloved in Atchison, possessing as she did a sweet disposition, and ever thoughtful and considerate of others. She was born twenty-eight years ago, in Stuart, Nebraska. She had lived in Atchison fifteen years, her father, who is a lumberman, having brought his family here to live. She was carefully educated, and specialized in music, being a talented pianist, and she played the harp. She was bright, ambitious and charming, and her family have the most sincere sympathy of the Atchison people in their loss. Besides her parents Ruth Davis is survived by two sisters, Miss Bessie and Miss Naomi Davis, and one brother, Russell. She was an Episcopalian and the funeral, which will take place Wednesday afternoon at 2:30, from the residence, on Fourth and L streets, will be conducted by the Rev. Alexander Grant, of Trinity Episcopal church.

Virginia, three and a half years old, daughter of Mr. and Mrs. Heber Mize, died at 8:30 this morning with Spanish influenza. She was stricken a week ago Sunday, and her attending physicians administered anti-toxin, as a diphtheria preventive, and not because the child had that disease, as her illness was alarming from the first. She is the second to die of the children in the family of Mr. and Mrs. Mize. The first was Heber Jr., whose death occurred two years ago. Besides her parents Virginia is survived by three sisters and two brothers. She was a particularly engaging and lovable child, and the deepest sympathy is felt for the bereaved parents. Her father has been at home ill for nearly two weeks, and her mother is ill with the influenza, and four days ago was given a preventive dose of anti-toxin. The funeral will take place tomorrow, and of necessity will be private.

### TWO DEATHS IN ONE FAMILY

Two deaths in one family from pneumonia following influenza have resulted in the Conrad household near Rushville. Dennis A. Conrad died Saturday night and the infant son of Frank Conrad died Friday night. The entire Conrad family is still with influenza and pneumonia has developed in some of the cases. The ill ones are Porter Conrad, Mr. and Mrs. Frank Conrad, Mr. and Mrs. James Conrad, and a small son of Hal Conrad, of St. Joe, who is visiting at the Conrad home near Rushville. Dennis Conrad was 43 years old, and had lived in that vicinity all his life. His death occurred at 8:30 o'clock Saturday evening, and burial took place yesterday afternoon in Armstrong cemetery. Funeral services were very brief.

## GRADUALLY STAMP OUT FLU

Spanish influenza is gradually being stamped out in Atchison and the county, according to reports today to the office of Dr. Charles W. Robinson, county health officer. Reports including Saturday afternoon, Sunday and up to noon today, a total of 48 hours, totaled only 21 cases, 11 in the city and 10 in the county.

There are no inmates at the emergency hospital, Third and Commercial streets, and the place has been closed for the present. There were 11 patients cared for there, and not a death. Mrs. Virginia Kimble, who was in charge of the hospital, is at the home of Dr. Robinson, threatened with influenza, but attending physicians gave her a dose of serum last night and it is believed the flue will be averted. She was quite ill last night from the effect of the serum.

**SPANISH INFLUENZA**  
**RAPIDLY SPREADING**

**Persons Weak and Run-down Easy Victims—Fortify Yourself Against It By Taking Tanlac.**

According to late reports issued by State and Federal health authorities the Spanish influenza epidemic is rapidly spreading to all parts of the country, and it now seems that practically every state in the Union will be seriously affected before it runs its course.

It has not only become a great and terrifying menace to the public health, but unless checked, it is apt to seriously affect the progress of war work in all its various departments. Already the Shipping Board has announced that ten per cent of its workers had been affected.

The disease has made its greatest progress in the East where it has claimed its victims by the thousand.

Reports from other sections, however, are equally alarming; and both civil and military authorities have warned the public to take every precaution to prevent its further spread. In many cities schools, churches and theatres have been closed and public gatherings of all kinds forbidden.

Medical authorities agree that people who are weak and run-down are the earliest victims of the Influenza epidemic. If you find yourself tired, weak and losing flesh, or if you are in a generally run-down condition, or if you catch cold easily this warning should be heeded promptly. You are really in great danger,—because the germ of this disease is very catching and you are apt to fall an easy victim if you come in contact with the Hagerma. People who are well and strong are not likely to contract the disease because they are able to throw it off. The common-sense way to keep from taking it is to fortify the system against attack by building up the constitution.

In other words to use the old adage, "An ounce of prevention is worth a pound of cure." And if you are in a sub-normal condition the proper thing to do is to begin immediately to build up your powers of resistance. To accomplish this, nothing on earth will strengthen you and build you up like Tanlac, the powerful reconstructive tonic, which contains the very elements needed by the system to give you fighting strength and ward off the influenza germ.

First of all Tanlac begins its action by creating a good healthy appetite for wholesome, nourishing food, and assists every organ of the body to perform its natural functions, thus helping to build up health and strength in the natural way.

Tanlac is also the ideal strengthening tonic for persons who are suffering from the after effects of influenza, Grippe or Bronchial troubles and hundreds of thousands are using it daily with the most gratifying results.

In connection with the Tanlac treatment, it is necessary to keep the bowels open by taking Tanlac Laxative Tablets, samples of which are included with every bottle of Tanlac. It is also important that the every day rules of hygiene be observed; that is, sleep in well ventilated rooms, get plenty of fresh air and exercise and keep away from crowds.

Tanlac is sold in Atchison by Byrnes' Pharmacy, in Effingham by Ebert & Co., and in Muscotah by Bacon & Son.

**FLU SLOWS  
IN KANSAS**

**Decrease of 400 Cases Daily  
Over Last Week.**

**DR. S. J. CRUMBINE REPORTS**

**Statewide Reports Indicate Far  
More Favorable Condition—  
Over the Country.**

Topeka, Kas., Oct. 22.—Today's state-wide reports on the influenza epidemic indicate the most favorable conditions for more than a week, said Dr. S. J. Crumbine, head of the state board of health department. There is a decrease of four hundred cases under last week's average of 2,000 cases daily. The epidemic will probably develop about 1,500 new cases daily this week, Dr. Crumbine estimated.

**Spreads in Nebraska.**

Lincoln, Neb., Oct. 22.—Spread of Spanish influenza in Nebraska continued today, according to the state board of health. Approximately 5,000 new cases were reported since yesterday.

**CRAZED BY FLU.**

**Chicago Man Killed Wife and Four Children.**

Chicago, Oct. 22.—Peter Marrano, coming home last night delirious with influenza, killed his wife and four children, also ill of the disease, by cutting their throats. He then inflicted probably fatal wounds on himself.

**Flu in Buenos Aires.**

Buenos Aires, Oct. 22.—The influenza epidemic which has seriously hampered business and other activities continues to spread. The government today ordered all schools closed until further notice.

**Back to Normal in Boston.**

Boston, Oct. 21.—Normal conditions were resumed in this city today when places of public assembly were allowed to re-open by health officials. These places had been closed for nearly three weeks because of the epidemic of influenza which caused nearly 4,000 deaths in Boston. Health officials believe the disease is under control.

**Administering Vaccine.**

Chicago, Oct. 21.—Administration of vaccine as a preventive of influenza was begun today by the city health department. A shipment of 100,000 doses was received from Rochester, Minn., and other shipments are to follow. The health department also began the manufacture of the vaccine and by Wednesday, it was said, the city would be prepared to distribute 100,000 doses daily.

A treatment with vaccine, which is supposed to be a preventive, but not a cure, consists of three doses administered by subcutaneous inoculation.

**Bring Refugees Here.**

**7 THREE DEATHS IN ONE FAMILY NEAR RUSHVILLE**

Three deaths in one family from pneumonia following influenza, have resulted in the home of the late Tom H. Crumpacker, at DeKalb, Mo., in the last week. The latest death was that of Hazel Crumpacker, 19 years old, which occurred last night. Tom H. Crumpacker, her father, died Sunday night, and his son, Ed Crumpacker, who was at Camp Pike, Ark., became ill while home on a furlough and died a week ago Sunday.

Funeral arrangements for the late Tom Crumpacker and his daughter have not yet been made, as word from relatives has not yet been received. Tom Crumpacker was 54 years old, and was a brother of William G. Crumpacker, formerly of Atchison, who now lives at DeKalb. For many years Mr. Crumpacker clerked in a hardware store at DeKalb and had a wide acquaintance.

The late Mr. Crumpacker's aged mother, Mrs. S. A. Dankston, who made her home with him, suffered an attack of influenza, but escaped pneumonia and recovered. She is more than 80 years old. Two other daughters, Augusta and Thelma Crumpacker, also suffered attacks and both recovered. In addition to the relatives named, the late Mr. Crumpacker is survived by his widow and one son, Fred, who is in France; a brother, Frank, of Denver, Colo., and a sister in Oklahoma. He also is survived by a step-daughter, Mrs. Kelly Thomas, of DeKalb.

The double funeral will be at 2 o'clock tomorrow afternoon in the park at DeKalb, if the weather is favorable. If not favorable the funeral will be private at the home.

Senator Ledge in DeKalb

**FLU EPIDEMIC UNDER CONTROL**

**at Only Five New Cases Reported Today.**

**MOVING PICTURES SATURDAY**

**If Request of Mayor Weinman to State Authorities to Lift Quarantine Is Heeded by State.**

Rigid quarantine regulations have virtually stamped out Spanish influenza in Atchison county. Only five new cases were reported today to the office of Dr. C. W. Robinson, county health officer, and four of these are in one household. Mrs. Mary Barker and three children, 1614 Main street, all are ill with the flu today. It is anticipated the quarantine in Atchison county will be raised possibly before the state quarantine, on account of the rapidly improving local conditions. Today's report is the smallest since the quarantine was established two weeks ago, the next smallest having been eight, reported yesterday. Seventy-five new cases were reported a week ago today, which indicates the flu in Atchison county has been conquered.

Dr. Robinson's prompt actions in putting on the quarantine, even before the state quarantine became effective, is responsible for the comparatively small number of cases in Atchison and the county have suffered. There have been eight deaths in the county as a result of pneumonia following influenza. Had not the quarantine been put on promptly there might have been a lot more. It was stated today the quarantine will be raised as soon as the authorities consider it safe.

**May Be Church Sunday.**

Louis Weinman, mayor of Atchison, wrote to Dr. S. J. Crambine, secretary of the State Board of Health yesterday asking permission to raise the quarantine here Friday night. With the flu practically stamped out today, it is reasonable to believe it will be entirely eradicated by that time. In case the request is granted, movie houses will open again Saturday afternoon and churches will reconvene Sunday. The quarantine has been in effect nearly two weeks.

**FLU ABATING OVER STATE.**

**But No Decision as Yet When Schools Will Open**

Topeka, Kas., Oct. 23.—A gradual abatement in the influenza epidemic was noticeable throughout the state as a whole today, said Dr. S. J. Crambine, head of the state health department, but in some localities the disease still is giving much trouble. The western two-thirds of the state shows a marked decrease in the number of cases, but in Marshall county the disease is on the increase and there is no improvement in Kansas City, Kas. Wichita reports 87 new cases and seven deaths Tuesday.

As to when the state schools will be re-opened no decision has yet been made. Dr. Crambine went to Lawrence today to inquire into the epidemic conditions.

**On Increase in New York.**

New York, Oct. 23.—Dismissing the hope that the Spanish influenza epidemic was on the wane, 5,390 new cases, the greatest number since the beginning of the epidemic, were reported here today.

Lansing, Mich., Oct. 23.—Six thousand new cases of influenza in Michigan since Tuesday morning, were reported to the state board of health this forenoon.

Minneapolis, Oct. 23.—During the past 24 hours, 633 new cases of influenza have been reported in Minneapolis. The disease caused twenty deaths.

## "DON" MULVANE DEAD.

**Topeka Millionaire Succumbs to  
Pneumonia.**

Topeka, Oct. 23.—John David Mulvane, 37, who only a few months ago inherited more than a million upon the death of his foster father, John R. Mulvane, died here early today from pneumonia, following an attack of Spanish influenza. Mr. Mulvane was familiarly known as "Don" Mulvane. He is survived by his wife and two children, both girls.

## SPANISH INFLUENZA RAPIDLY SPREADING

**Persons Weak and Run-down Easy Victims—Fortify Yourself Against It By Taking Tanlac.**

According to late reports issued by State and Federal health authorities the Spanish Influenza epidemic is rapidly spreading to all parts of the country, and it now seems that practically every state in the Union will be seriously affected before it runs its course.

It has not only become a great and terrifying menace to the public health, but unless checked, it is apt to seriously affect the progress of war work in all its various departments. Already the Shipping Board has announced that ten per cent of its workers had been affected.

The disease has made its greatest progress in the East where it has claimed its victims by the thousands. Reports from other sections, however, are equally alarming; and both civil and military authorities have warned the public to take every precaution to prevent its further spread. In many cities schools, churches and theatres have been closed and public gatherings of all kinds forbidden.

Medical authorities agree that people who are weak and run-down are the earliest victims of the influenza epidemic. If you find yourself tired, weak and losing flesh, or if you are in a generally run-down condition, or if you catch cold easily this warning should be heeded promptly. You are really in great danger,—because the germ of this disease is very catching and you are apt to fall an easy victim if you come in contact with the germs. People who are well and strong are not likely to contract the disease because they are able to throw it off. The common-sense way to keep from taking it is to fortify the system against attack by building up the constitution.

In other words to use the old adage, "An ounce of prevention is worth a pound of cure." And if you are in a sub-normal condition the proper thing to do is to begin immediately to build up your powers of resistance. To accomplish this, nothing on earth will strengthen you and build you up like Tanlac, the powerful reconstructive tonic, which contains the very elements needed by the system to give you fighting strength and ward off the influenza germ.

First of all Tanlac begins its action by creating a good healthy appetite for wholesome, nourishing food, and assists every organ of the body to perform its natural functions, thus helping to build up health and strength in the natural way.

Tanlac is also the ideal strengthening tonic for persons who are suffering from the after effects of influenza, Grippe or Bronchial troubles and hundreds of thousands are using it daily with the most gratifying results.

In connection with the Tanlac treatment, it is necessary to keep the bowels open by taking Tanlac Laxative Tablets, samples of which are included with every bottle of Tanlac. It is also important that the every day rules of hygiene be observed; that is, sleep in well ventilated rooms, get plenty of fresh air and exercise and keep away from crowds.

Tanlac is sold in Atchison by Byrne's Pharmacy, in Edinburg by Ebert & Co., and in Muscotah by Bacon & Son.

## FLU CREST HAS BEEN PASSED

---

Washington, Oct. 24—For the first time since the influenza began spreading through the army camps, the weekly health report of the surgeon-general shows decreases in both hospital admission rates and deaths. The report for the week ending October 18, given out today shows a decrease in the death rate from 206 per thousand to 190 and in the admission rate for disease from 4,760 to 2,914.

The report says the crest of the epidemic has now been definitely passed, the number of influenza cases dropping one half and the number of pneumonia cases decreasing from 17,882 to 11,013.

# ANOTHER WEEK OF FLU BAN

## Lid On All Public Gatherings to Continue Here.

### NO NEW CASES IN ATCHISON

#### But Officials Hold We Can't Open Before Other Parts of the State — Bridge Ban Continues.

The lid on public gatherings of all kinds will not be lifted in Kansas or in Atchison county before the end of next week, according to information obtained by Louis Weinman, mayor of Atchison, with Dr. S. J. Crumline, secretary of the state board of health today.

Dr. Crumline said the quarantine cannot be raised in Atchison county before it is in other parts of the state, notwithstanding the fact it was in effect here several days before it went into state-wide effect.

At noon today no new cases of influenza had been reported to the office of Dr. C. W. Robinson, county health officer, but Miss Edna Heald, in charge of the office, had not yet telephoned to the many physicians of the city and county. Only five new cases in only two homes were reported yesterday, however, and it is reasonable to believe there will not be more today.

There will be no church services in Atchison Sunday, and the same rigid regulations with reference to pool halls, stores and the Atchison & Eastern bridge will continue effective until raised by the state board of health.

#### Gradual Decrease in State.

Topeka, Kas., Oct. 24.—Necessity for the removal of the state-wide closing order in combating the influenza epidemic in Kansas was expressed today by Dr. J. S. Crumline, head of the state health department. While a gradual decrease in the number of cases is recognized as a good indication, still there are notable exceptions, he said. If crowds again are permitted to congregate, one bad case in a school, church or theater he said would be sufficient to affect every person susceptible.

So great is the demand for nurses that Surgeon General Blue, Washington, has authorized the Kansas state board to use practical nurses who are not registered and today Dr. Crumline sent out a call for twenty-five for service in Kansas City. The pay is \$75 a month and traveling expenses.

Dr. Crumline spent yesterday at Lawrence. Regardless of action in regard to state wide closing, he said, the closing order would be maintained there for at least another week.

Dr. Crumline this afternoon announced that the state wide closing order will be continued until midnight of November 2.

## FLU EPIDEMIC IN KANSAS SUBSIDING FAS

Atchison and Fort Scott Show Great-  
est Improvement in Past  
24 Hours.

Topeka, Oct. 25.—Optimism concern-  
ing the conditions of the influ-  
enza epidemic in Kansas continued  
to radiate from the state department  
of health. Dr. S. J. Crumbine an-  
nounced that reports show a con-  
tinued decline of the disease.

In Kansas City, Kas., where condi-  
tions have been very bad the last few  
days, health authorities are improv-  
ing their organization and reports in-  
dicate they are overcoming the crisis.

Wichita reports slight improvement.  
The last 24 hours have marked the  
most improvement yet at Fort Scott  
and Atchison. Manhattan reports  
great improvement. In Independ-  
ence and Hutchinson, which have  
been hard hit, there is little change.  
In both deaths and numbers of cases  
the condition in Topeka is greatly im-  
proved.

The appeal for volunteer nurses  
has met with no response, Dr. Crum-  
bine stated today, and unless the  
needed are procured today, the ap-  
peal will have to be made outside the  
state.

## FLU BAN AT FUNSTON EASED

### QUARANTINE AGAINST JUNCTION CITY RAISED.

**Death Losses Have Been Heavy; Gen. Wood Commends Spirit of Troops.**

Camp Funston, Kas., Oct. 25—Lightening of the stringent regulations against association between soldiers and civilians on account of the influenza epidemic and commendation of the spirit shown by the Tenth division during the crisis are announced today in regulations and an order from Major General Leonard Wood. The quarantine against Junction City has been raised. Commencing tomorrow "if conditions are entirely favorable," week end passes may be issued and commencing next Tuesday four-day passes may be issued. Tomorrow hostess houses may be re-opened, with only limited numbers allowed inside at a time, while Saturday and Sunday visitors will be admitted to any portion of the divisional area proper or the detention camps but will only be allowed to see their relatives in the open air.

After commending the services of the medical officers, nurses, and hospital personnel, General Wood's order says:

"The losses of the division from death have been heavy; heavier than in many a severe action. Many thousands of men have been sick but there has been neither complaint or unrest. Both men and officers have worked hard to better conditions. The spirit shown speaks well for the future conduct of the division."

# BEST KANSAS FLU REPORT

## Epidemic Now Severe Only in Kansas City, Kas.

Topeka, Oct. 26.—A reduction in the number of new cases of influenza in Kansas from 2,030 last Monday, to 1,071 reported in the last 24 hours, was announced by the state health today. Kansas City, Kas., continues to give the most trouble, 326 new cases being reported today by Wyandotte county.

Dr. S. J. Crumbine, head of the health department, declared that today's report was the most favorable since the epidemic began to sweep the state.

## IS INFLUENZA WORSE THAN HUN BULLETS

**Claiming More Victims Than Battle Fronts of Europe—Disease Can Be Avoided.**

According to carefully compiled statistics it is an indisputable fact that the Spanish Influenza epidemic which is now sweeping all parts of the country is daily claiming far more victims than German bullets on the battle fronts of Europe. Although civil and military authorities have succeeded in checking the disease in some localities, it is growing worse in others and continues to spread at an alarming rate. That the disease can be avoided there is no longer any doubt. According to leading authorities the powers of resistance of the human system can be so perfected that it can throw off almost any infection, not even excepting Spanish Influenza, which is one of the most contagious diseases known.

It is persons who are suffering from lowered vitality, who are weak and rundown and who have not the strength to throw it off who are the earliest victims. Persons who have bad colds, who are suffering from catarrhal troubles, or inflammation of the mucous membranes are especially susceptible, as the inflamed mucous membrane linings of the nose and throat are an open door to the germs. This condition is almost always accompanied by a weakened condition of the system.

If you are suffering from any of these symptoms, nothing on earth will build you up and strengthen you like Tanlac, which contains the most powerful tonic properties known to science.

This statement is easily proven by the fact that Tanlac is now having the greatest sale of any system tonic in the history of medicine. In less than four years time over Ten Million Bottles have been sold and the demand is constantly increasing. Thousands are using it daily for the above troubles with the most astonishing and gratifying results.

Tanlac increases your strength and weight and creates a good, healthy appetite for nourishing food. It keeps you physically fit and helps every organ of the body perform its proper function in the natural way.

In connection with the Tanlac Treatment be sure and keep the bowels open by taking Tanlac Laxative Tablets, samples of which are included in every bottle.

Tanlac is sold in Atchison by all Byrnes' Pharmacy, in Effingham by Ebert & Co., and in Muscotah by Bacon & Son.

## ONLY TWO NEW FLU CASES

Only two new cases of influenza in Atchison were reported to the office of Dr. C. W. Robinson, county health officer today. One death from pneumonia following influenza occurred over Sunday, the 3-year-old daughter of Thomas Ruiz, a Mexican living at 1700 Beach street, dying Saturday night. Today's flu report was the smallest since the epidemic began, and it is believed the disease has been effectively checked.

When he returns to the Great Lakes

## DRUGGISTS!! PLEASE NOTE VICK'S VAPORUB OVERSOLD DUE TO PRESENT EPIDEMIC

Tremendous Demand Last Few Days Wiped Out Excess Stocks That We Had Estimated Would Last Until Next January. Last Week's Orders Called For One and Three Quarter Million Jars—Today's Orders Alone Amount to 932,459 Jars.

**Big Shipments Are En Route to Jobbers. Until These Arrive There May Be a Temporary Shortage. All Deals Postponed—buy in Small Lots Only.**

**RETAILERS CAN GET IMMEDIATE SHIPMENTS BY PARCEL POST.**

This advertisement is written on Monday, October 21st. It is directed to the attention of all distributors of Vick's Vaporub, both wholesale and retail. In an emergency such as the present epidemic—our duty—and your duty—is to distribute Vaporub in the quickest possible manner to those sections stricken by Influenza. We, therefore, call your careful attention to the following:

**DANGER OF SHORTAGE IF SUPPLY IS NOT CONSERVED.**

On October 1st we had on hand, at our Factory and in twenty warehouses scattered over the country, sufficient Vaporub to last us, we thought, until January 1st, allowing for a 50% increase over last year's sales, and not counting our daily output. This big excess stock had been accumulated during the summer months.

Then this epidemic of Spanish Influenza hit us—and in the last 10 days this stock has vanished. At first we thought this tremendous demand would last only a few days, but the orders have run:

Wed., Oct. 16—18,504 Doz.  
Thurs., Oct. 17—25,223 Doz.  
Fri., Oct. 18—28,256 Doz.  
Sat., Oct. 19—45,833 Doz.  
Mon., Oct. 21—77,705 Doz.

Up to Saturday, October 19th, we have actually shipped for this month \$499,284.10, or over two million jars of Vaporub.

**THE PROBLEM NOW IS TO DISTRIBUTE VAPORUB QUICKLY.**

Most of this tremendous quantity is still en route to the jobbers, but freight and express are both congested nowadays, and it may be some time before this supply reaches the jobbers. In the meantime, therefore, it is necessary that we distribute, as widely as possible, the stock that we are manufacturing daily, together with that now on the jobbers' and retailers' shelves, in order that it may get to the influenza districts quickly. Our normal output is about 4,000 dozens per day. We are putting on a night shift, but it will be a little while before that is producing.

**WHAT WE ASK THE WHOLESALE DRUGGIST TO DO.**

Last Saturday we notified all of our jobbers, by Special Delivery, as follows:

1st—Deals and quantity shipments of all kinds are canceled. Fill no quantity orders of any kind, whether taken by our salesmen or by your own. Sell in small

lots only.

2nd—Order from us in as small quantities as possible. If you are out we will try to ship a limited amount by Parcel Post or express, and pay the charges ourselves.

3rd—In order to make distribution still quicker, we will ship direct to your retail customers quantities not more than three (3) dozen 30c size at any one shipment.

4th—We are now out of the 60c size and will be for the next 10 days.

**WHAT WE ASK THE RETAIL DRUGGIST TO DO.**

Buy in as small quantities as possible. If you have any quantity orders, given the jobber's salesmen or given to our salesmen, don't bother about them—no need to write us—it is absolutely impossible to fill these orders at this time. If the jobbers in your territory are out of Vick's Vaporub, we will ship you by Parcel Post, prepaid, quantities not more than three (3) dozen 30c size in any one order. Naturally, we can't open accounts at this time, so your check or money order for this amount must accompany order. Don't write us stating to ship thru your jobber, as we then have to wait until we write this jobber and get his O. K. If you wish the goods to come thru your jobber, have him order them for you.

**SNOWED UNDER WITH CORRESPONDENCE.**

Our force has already been "shot to pieces"—twenty-four of our men are wearing Uncle Sam's khaki—and this recent rush has simply buried us. All our sales force has been called in to help in the office and factory. We just mention this so you won't hold it against us if your wires and letters aren't answered promptly.

**SPECIAL BOOKLETS ON SPANISH INFLUENZA.**

We will send, on request, to any retail druggist, 100 or more little booklets, just issued, on Spanish Influenza, giving the latest information about this disease—its history—the symptoms—the treatment, and particularly the use of Vick's Vaporub as an external application to supplement the physician's treatment.

**NEW WAYS TO USE VAPORUB.**

In addition to the usual method of using Vaporub—that is, applied over the throat and chest and covered with hot flannel cloths—our customers are writing us daily telling of their success in using Vaporub in other ways, particularly as a preventive. They melt a little in a spoon and inhale the vapors arising, or melt it in a benzoin steam kettle. Where the steam kettle is not available, Vaporub can be used in an ordinary tea-kettle. Fill the tea-kettle half full of boiling water, put in half a teaspoonful of Vaporub from time to time—keep the kettle just slowly boiling and inhale the steam arising.

According to a Bulletin just issued by the Public Health Service, Dr. Stiles, of this Service, recommends that the nose be kept greased as a preventive measure against the influenza germs. For this purpose Vaporub is excellent.

## SCARE AND THE INFLUENZA

If there is an influenza germ it isn't probable that you can annex or acquire it by being afraid, but there is nevertheless, a lot of truth in the position taken by Dr. W. C. White, of Des Moines, Iowa, who urges a course of common sense and the basic ideas of Christian Science directed against fear, in the Spanish influenza epidemic now prevalent there.

"There is no question," said Dr. White, "that by a right attitude of mind people have kept themselves from illness. I have no doubt that many persons have contracted the disease through fear. People can deceive themselves into thinking they have any disease on the calendar, and doubtless many of them have thought themselves into their graves. Fear is the first thing to be overcome, the first step in conquering this epidemic. I am not a Christian Scientist, but I believe an application of their principles will materially aid in preserving the health of this community."

If we can forget the flu, we will soon be rid of it.

Owing to the Influenza situation in Kansas City, Grand Opera Committee announces

## Postponement Of Opera Dates

of Chicago Opera Association.

**NEW DATES WILL BE  
ANNOUNCED LATER.**

*Seat Sale Continues*

For further information  
call Miss Kate Bayles.  
Phone 1257.

**THE BAN OFF  
SATURDAY**

**Kansas Statewide Order Officially Withdrawn.**

**BUT NOT MARSHALL COUNTY**

**In Communities Where Disease Still Is Prevalent Quarantine Will Continue.**

Topeka, Kas., Oct. 30—The state health department today announced that the state wide closing order against the epidemic of influenza, which has been in operation three weeks will be withdrawn Saturday, midnight. Certain communities, however, where the disease still is prevalent, will continue the ban against public gatherings. Dr. J. S. Crumline, head of the state health department today sent letters of instructions to all local health officers offering instructions on handling community situations.

Marshall county, it was announced, will continue the closing order. Wyandotte county shows only a slow improvement, it was announced. New cases were reported today in some western counties, especially Hodge-man, Greeley and Scott, indicating a new outbreak of the epidemic.

**Lifted in Indianapolis.**

Indianapolis, Ind., Oct. 30.—Indianapolis tomorrow will resume business as usual, the ban against public meetings, and orders that business be conducted under certain restrictions because of influenza epidemic having been lifted by the board of health today.

Only one new family has the influenza today, according to reports made since yesterday noon to the office of Charles W. Robinson, county health officer. The new case is Andy Bush, 1209 Julia street. Three new cases were reported at the home of H. B. Mize, Sixth and Parallel streets, and the Mize home is under quarantine again. A total of 10 new cases have been reported since yesterday noon in the city and county, but all are in homes where the disease has been before during the epidemic.

# DRUGGISTS!! PLEASE NOTE VICK'S VAPORUB OVERSOLD DUE TO PRESENT EPIDEMIC

Tremendous Demand Last Few Days Wiped Out Excess Stocks That We Had Estimated Would Last Until Next January. Last Week's Orders Called For One and Three Quarter Million Jars—Today's Orders Alone Amount to 932,459 Jars.

**Big Shipments Are En Route to Jobbers. Until These Arrive There May Be a Temporary Shortage. All Deals Postponed—buy in Small Lots Only.**

## RETAILERS CAN GET IMMEDIATE SHIPMENTS BY PARCEL POST.

This advertisement is written on Monday, October 21st. It is directed to the attention of all distributors of Vick's Vaporub, both wholesale and retail. In an emergency such as the present epidemic—our duty—and your duty—is to distribute Vaporub in the quickest possible manner to those sections stricken by influenza. We, therefore, call your careful attention to the following:

### DANGER OF SHORTAGE IF SUPPLY IS NOT CONSERVED.

On October 1st we had on hand, at our Factory and in twenty warehouses scattered over the country, sufficient Vaporub to last us, we thought, until January 1st, allowing for a 50% increase over last year's sales, and not counting our daily output. This big excess stock had been accumulated during the summer months.

Then this epidemic of Spanish Influenza hit us—and in the last 10 days this stock has vanished. At first we thought this tremendous demand would last only a few days, but the orders have run:

- Wed., Oct. 16—18,564 Doz.
- Thurs., Oct. 17—25,323 Doz.
- Fri., Oct. 18—39,256 Doz.
- Sat., Oct. 19—45,833 Doz.
- Mon., Oct. 21—77,505 Doz.

Up to Saturday, October 19th, we have actually shipped for this month \$400,284,110, or over two million jars of Vaporub.

### THE PROBLEM NOW IS TO DISTRIBUTE VAPORUB QUICKLY.

Most of this tremendous quantity is still en route to the jobbers, but freight and express are both congested nowadays, and it may be some time before this supply reaches the jobbers. In the meantime, therefore, it is necessary that we distribute, as widely as possible, the stock that we are manufacturing daily, together with that now on the jobbers' and retailers' shelves, in order that it may get to the influenza districts quickly. Our normal output is about 4,000 dozen per day. We are putting on a night shift, but it will be a little while before that is producing.

### WHAT WE ASK THE WHOLESALE DRUGGIST TO DO.

Last Saturday we notified all of our jobbers, by Special Delivery, as follows:

- 1st—Deals and quantity shipments of all kinds are cancelled. Fill no quantity orders of any kind, whether taken by our salesmen or by your own. Sell in small

lots only.

2nd—Order from us in as small quantities as possible. If you are out we will try to ship a limited amount by Parcel Post or express, and pay the charges ourselves.

3rd—In order to make distribution still quicker, we will ship direct to your retail customers quantities not more than three (3) dozen 30c size at any one shipment.

4th—We are now out of the 60c size and will be for the next 10 days.

### WHAT WE ASK THE RETAIL DRUGGIST TO DO.

Buy in as small quantities as possible. If you have any quantity orders, given the jobber's salesmen or given to our salesmen, don't bother about them—no need to write us—it is absolutely impossible to fill these orders at this time. If the jobbers in your territory are out of Vick's Vaporub, we will ship you by Parcel Post, prepaid, quantities not more than three (3) dozen 30c size in any one order. Naturally, we can't open accounts at this time, so your check or money order for this amount must accompany order. Don't write us stating to ship thru your jobber, as we then have to wait until we write this jobber and get his O. K. If you wish the goods to come thru your jobber, have him order them for you.

### SNOWED UNDER WITH CORRESPONDENCE.

Our force has already been "shot to pieces"—twenty-four of our men are wearing Uncle Sam's khaki—and this recent rush has simply buried us. All our sales force has been called in to help in the office and factory. We just mention this so you won't hold it against us if your wires and letters aren't answered promptly.

### SPECIAL BOOKLETS ON SPANISH INFLUENZA.

We will send, on request, to any retail druggist, 100 or more little booklets, just issued, on Spanish Influenza, giving the latest information about this disease—its history—the symptoms—the treatment, and particularly the use of Vick's Vaporub as an external application to supplement the physician's treatment.

### NEW WAYS TO USE VAPORUB.

In addition to the usual method of using Vaporub—that is, applied over the throat and chest and covered with hot flannel cloths—our customers are writing us daily telling of their success in using Vaporub in other ways, particularly as a preventive. They melt a little in a spoon and inhale the vapors arising, or melt it in a benzoin steam kettle. Where the steam kettle is not available, Vaporub can be used in an ordinary tea-kettle. Fill the tea-kettle half full of boiling water, put in half a teaspoonful of Vaporub from time to time—keep the kettle just slowly boiling and inhale the steam arising.

According to a Bulletin just issued by the Public Health Service, Dr. Stiles, of this Service, recommends that the nose be kept greased as a preventive measure against the influenza germs. For this purpose Vaporub is excellent.

## HEIR APPARENT AN INFLUENZA VICTIM

King Alphonso of Spain Recovered  
From Disease.

Barcelona, Oct. 31—Announcement  
is made here that Ezrabin Abbas,  
heir apparent of Ahmed Fuad Pasha,  
Khedive of Egypt, died of influenza  
on Monday.

Madrid, Oct. 31—It is announced  
that King Alphonso, who has been  
suffering from an attack of influenza  
has been restored to health.

### FLU MASKS WORKED.

Transport With 6,000 American  
Troops Had Only One Death.

London, Oct. 31—A transport car-  
rying 6,000 American soldiers has ar-  
rived at a British port. During the  
trip there were only fifty cases of in-  
fluenza recorded. One death was  
caused by the disease. The success  
achieved in combatting the malady  
was due, in the opinion of physicians  
to the fact that every man wore a  
cloth mask during the voyage.

**HOW TO FIGHT  
Spanish Influenza**

By Dr. L. W. Bowers.

Avoid crowds, coughs and cowards, but fear neither germs nor Germans! Keep the system in good order, take plenty of exercise in the fresh air and practice cleanliness. Remember a clean mouth, a clean skin, and clean bowels are a protecting armour against disease. To keep the liver and bowels regular and to carry away the poisons within, it is best to take a vegetable pill every other day, made up of May-apple, aloes, jalap, and sugar-coated, to be had at most drug stores, known as Dr. Pierce's Pleasant Pellets. If there is a sudden onset of what appears like a hard cold, one should go to bed, wrap warm, take a hot mustard foot-bath and drink copiously of hot lemonade. If pain develops in head or back, ask the druggist for Anuric (anti-uric) tablets. These will flush the bladder and kidneys and carry off poisonous germs. To control the pains and aches take one Anuric tablet every two hours, with frequent drinks of lemonade. The pneumonia appears in a most treacherous way, when the influenza victim is apparently recovering and anxious to leave his bed. In recovering from a bad attack of influenza or pneumonia the system should be built up with a good herbal tonic, such as Dr. Pierce's Golden Medical Discovery, made without alcohol from the roots and barks of American forest trees, or his Iron Tonic (iron tonic) tablets, which can be obtained at most drug stores, or sent for 10c. to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial package.

**HILL'S**  
  
**CASCARA BROMIDE QUININE**

**Standard cold remedy for 20 years—in tablet form—safe, sure, no opiates—breaks up a cold in 24 hours—relieves grip in 3 days. Money back if it fails. The genuine box has a Red top with Mr. Hill's picture. At All Drug Stores.**

# RUGGISTS!! PLEASE NOTE VICK'S VAPORUB OVERSOLD DUE TO PRESENT EPIDEMIC

Immense Demand Last Few Days Wiped Out Excess Stocks That We Had Estimated Would Last Until Next January. Last Week's Orders Called For One and Three Quarter Million Jars—Today's Orders Alone Amount to 932,450 Jars.

Shipments Are En Route to Jobbers. Until These Arrive There May Be a Temporary Shortage. All Deals Postponed—buy in Small Lots Only.

## RETAILERS CAN GET IMMEDIATE SHIPMENTS BY PARCEL POST.

This advertisement is written on Monday, October 21st. It is directed to the attention of all distributors of Vick's Vaporub, both wholesale and retail. In an emergency such as the present epidemic—our duty—and our duty—is to distribute Vaporub in the quickest possible manner to those sections stricken by Influenza. Therefore, call your careful attention to the following:

### NO SHORTAGE OF SUPPLY IS NOT CONSIDERED.

On October 1st we had on hand at our factory and in twenty warehouses scattered over the country, sufficient Vaporub to last us, we thought, until January 1st, allowing for a 50% increase over last year's sales, and not counting our daily output. This big stock had been accumulated during the summer months. When this epidemic of Spanish Influenza hit us—and in the last 10 days the stock has vanished. At first we thought this tremendous demand would last only a few days, but the orders have run:

- Wed., Oct. 16—18,504 Doz.
- Thurs., Oct. 17—25,323 Doz.
- Fri., Oct. 18—39,256 Doz.
- Sat., Oct. 19—45,833 Doz.
- Mon., Oct. 21—77,705 Doz.

Up to Saturday, October 19th, we have actually shipped for this month 292,241 Doz., or over two million jars of Vaporub.

### THE PROBLEM NOW IS TO DISTRIBUTE VAPORUB QUICKLY.

Most of this tremendous quantity will be en route to the jobbers, but light and express are both congested nowadays, and it may be some time before this supply reaches the jobbers. In the meantime, therefore, it is necessary that we distribute, as early as possible, the stock that we are manufacturing daily, together with that now on the jobbers' and retailers' shelves, in order that it may reach the influenza districts quickly. Our normal output is about 4,000 jars per day. We are putting on a night shift, but it will be a little while before that is producing.

### WHAT WE ASK THE WHOLESALE DRUGGIST TO DO.

Last Saturday we notified all of our jobbers, by Special Delivery, as follows:—Deals and quantity shipments of all kinds are cancelled. Fill no quantity orders of any kind, whether taken by our salesmen or by your own. Sell in small

lots only.

2nd—Order from us in as small quantities as possible. If you are out we will try to ship a limited amount by Parcel Post or express, and pay the charges ourselves.

3rd—In order to make distribution still quicker, we will ship direct to your retail customers quantities not more than three (3) dozen 30c size at any one shipment.

4th—We are now out of the 60c size and will be for the next 10 days.

### WHAT WE ASK THE RETAIL DRUGGIST TO DO.

Buy in as small quantities as possible. If you have any quantity orders, given the jobber's salesmen or given to our salesmen, don't bother about them—no need to write us—it is absolutely impossible to fill these orders at this time. If the jobbers in your territory are out of Vick's Vaporub, we will ship you by Parcel Post, prepaid, quantities not more than three (3) dozen 30c size in any one order. Naturally, we can't open accounts at this time, so your check or money order for this amount must accompany order. Don't write us stating to ship thru your jobber, as we then have to wait until we write this jobber and get his O. K. If you wish the goods to come thru your jobber, have him order them for you.

### SNOWED UNDER WITH CORRESPONDENCE.

Our force has already been "shot to pieces"—twenty-four of our men are wearing Uncle Sam's khaki—and this recent rush has simply buried us. All our sales force has been called in to help in the office and factory. We just mention this so you won't hold it against us if your wires and letters aren't answered promptly.

### SPECIAL BOOKLETS ON SPANISH INFLUENZA.

We will send, on request, to any retail druggist, 100 or more little booklets, just issued, on Spanish Influenza, giving the latest information about this disease—its history—the symptoms—the treatment, and particularly the use of Vick's Vaporub as an external application to supplement the physician's treatment.

### NEW WAYS TO USE VAPORUB.

In addition to the usual method of using Vaporub—that is, applied over the throat and chest and covered with hot flannel cloths—our customers are writing us daily telling of their success in using Vaporub in other ways, particularly as a preventive. They melt a little in a spoon and inhale the vapors arising, or melt it in a benzoin steam kettle. Where the steam kettle is not available, Vaporub can be used in an ordinary tea-kettle. Fill the tea-kettle half full of boiling water, put in half a teaspoonful of Vaporub from time to time—keep the kettle just slowly boiling and inhale the steam arising.

According to a Bulletin just issued by the Public Health Service, Dr. Stiles, of this Service, recommends that the nose be kept greased as a preventive measure against the influenza germs. For this purpose Vaporub is excellent.

THE VICK CHEMICAL COMPANY, Greensboro, N. C.
